

Advance Illness and Frailty Exclusions

Exclusion Information

The National Committee for Quality Assurance ("NCCA") added exclusions for members with advanced illness and frailty or who live in long-term nursing home settings for specified measures.

The information presented reflects the HEDIS specifications but is not meant to preclude clinical judgment. Treatment decisions should always be based on the clinical judgment of the physician or other healthcare providers.

Who will now be excluded from these measures?

Patients will be excluded when there is evidence of both criteria:

Frailty: durable medical equipment (DME) or services such as home health and skilled nursing, which are indicators of limited mobility or physical functionality.

- At least two indications of frailty with different dates of service during the measurement year.
- Advanced illness: severe chronic conditions such as emphysema, cirrhosis, leukemia, heart failure, dementia and end-stage renal disease
- Advanced illness on at least two different dates of service or dispensed dementia medication

Laboratory claims are not allowed (claims with POS code 81)

Which measures are impacted?

Listed below are the HEDIS measures to which these exclusions have been added. The majority of the impacted measures are also part of the Medicare Star ratings program (*) governed by the Centers for Medicare & Medicaid Services (CMS).

Patients 66-80 with frailty AND advanced illness, as well as those 81 years old and older with frailty ONLY:

- Controlling blood pressure (CBP)*
- Kidney Health Evaluation for patients with Diabetes (KED)*
- Osteoporosis management in women who had a fracture (OMW)*
 - **The age range for OMW eligibility is 67-85.**

Patients 66 years old and older with frailty AND advanced illness:

- Breast cancer screening (BCS-E)*
- Colon cancer screening (COL-E)*
- Statin therapy for patients with cardiovascular disease (SPC)*
- Eye Exam for Patients with Diabetes (EED)*
- Glycemic Status Assessment for Patients With Diabetes (GSD)*

How will patients be identified for exclusion?

Codes from NCQA's advanced illness value set and frailty value set will be used to identify patients for exclusion. Patients can only be excluded via appropriate and applicable coding. Medical records and other proof of service documents cannot be used for these exclusions.

- Advanced Illness Exclusions are based on any of the following claim types with advanced illness code(s) during the current measurement year or prior year:
 - Two outpatient, observation or non-acute inpatient visits on different dates of services
 - One acute inpatient stay
 - One dispensed dementia medication
- Frailty exclusions are based on two (2) indications of a frailty code on different dates of service during the current measurement year

Advanced Illness & Frailty Value Sets

The following table outlines the Current Procedural Terminology (CPT®), Healthcare Common Procedure Coding System (HCPCS) and ICD-10 diagnosis procedure codes for each of these value sets.

CODE	CODE	DEFINITION
